## THE FIEND

The Fiend represents the inevitability of great calamities and pervasive dangers. As long as you have The Fiend invested, when you repeat a non-Strike action you previously took in the same round, you gain a +2 item bonus to checks to perform that action. This increases to a +3 item bonus if you are at least 17th level.

**Frequency:** Once per day

You wave the card to create a vision of destruction around you; you cast phantasmal calamity, except the area is a 20-foot emanation. The level of the spell is one-half your level, rounded down (minimum 6th level), and the save DC is your class DC. You are immune to the effects of your own phantasmal calamity.
